COAL SCIENCE AND TECHNOLOGY

Vol. 53 No. 5 May 2025

CONTENTS

Mining Science and Engineering

- Multi-bed separation grouting in “three soft” thick coal seams mining and their application
..... *GUO Wenbing, WU Dongtao, GUO Mingjie, et al* (1)
- Strong mine pressure appearing mechanism and control at deep buried working face with large mining height
..... *LEI Zhaoyuan, ZHAO Maoping, LI Tuanjie, et al* (13)
- Experimental study on influence of fault dip angle on acoustic emission signal propagation
..... *JIA Baoxin, LI Bao, ZHOU Linli, et al* (23)
- Study on roof deflection distribution of ultra-long working faces based on matrix displacement method
..... *XING Youwang, LI Mingzhong, ZHANG Jinhu, et al* (39)
- Analysis of coal mine environment corrosion tendency based on fuzzy comprehensive evaluation method
..... *LI Shuaiqian, GUO Zhongping, WEN Zhuoyue, et al* (52)
- Subsection amplification cyclic deterioration mechanism of creep damaged coal
..... *LI Yangyang, ZHANG Shichuan, SHEN Baotang, et al* (64)
- Study on macro-and mesoscopic damage characteristics of fractured sandstone under cyclic loading and
unloading with variable upper limit *LIU Guangjian, ZHOU Hao, MU Zonglong, et al* (77)
- Influence of pore-fracture structure characteristics of coal rock on its damage evolution law
..... *ZHAO Yiqing, QIN Wenjing, JIN Aibing, et al* (90)
- Mechanical properties and energy evolution of combined coal-rock body under different stress states and strain
rates *MA Zhihui, MA Zhiyong, PAN Rongkun, et al* (102)
- Research on the time-dependent stability of filling paste under the action of different concentrations of chloride
salts *WEN Zhuoyue, DU Zhaowen, LI Shuaiqian* (114)
- Mechanism and control of slope instability slip induced by overburden migration in side coal mining
..... *LI Junpeng, WANG Wencai, WANG Chuangye, et al* (127)

Safety Science and Engineering

- Technology of cavity completion in surface cluster wells for assisting rock cross-cut coal uncovering in high
outburst coal seam *LIU Ting, ZHAI Cheng, TONG Xiaozhang, et al* (144)
- Research on deep hole convergence energy blasting for increasing permeability in deep wells with high gas and
low permeability coal seams *FU Shigui, LIU Zegong, CHANG Shuai, et al* (158)
- Simulated test of gas loss calculation during the freezing coring process in underground coal seam
..... *WANG Long, DENG Zhiliang, WANG Zhaofeng, et al* (174)
- Experimental study of pressure measurement without sealing hole based on coal core in situ volume recovery
..... *WU Kuan, WANG Zhaofeng, SHI Shiliang, et al* (186)
- Model and numerical solution method the failure of air volume and air flow components in the ventilation
network during the period of external fire *LI Wei, LIU Yanqing, ZHANG Lang* (196)

Fractal characteristics of spontaneous combustion of gas-bearing coal under different temperature and adsorption pressure conditions	<i>LI Zhenrong, TIAN Fuchao, WANG Gang, et al</i>	(213)
Spherical assembly model and prediction of pressure loss of porous media flow in goaf	<i>CHEN Fangxing, HAO Xiaoli, CHEN Shiqiang, et al</i>	(233)

Earth Science and Engineering

Research on adaptability of fracturing technologies for CBM horizontal wells based on the viewpoint of “unblocking and channeling”	<i>XIAO Yuhang, ZHU Qingzhong, ZHAO Qun, et al</i>	(243)
Geological characteristics and gas bearing control factors of shale gas in the Wufeng-Longmaxi Formation of the Shaozhai syncline in northeastern Yunnan	<i>LI Yu, XUE Xiaohui, ZHANG Jinbiao, et al</i>	(255)
Coal seam thickness prediction method based on multi-frequency joint application of channel wave	<i>QIU Nianguang, JIAO Wenjie, JIN Mingfang, et al</i>	(265)
Optimal selection test of material ratio in the top of Ordovician limestone grouting reconstruction	<i>FAN Zhenli, CAO Lutong, ZHANG Fengda, et al</i>	(277)

Mechatronics Engineering and Intelligence

On the academic ideology of “Sorting the gangue is sorting the images”	<i>MA Hongwei, ZHANG Ye, WANG Peng, et al</i>	(291)
Improvement of point cloud feature extraction and alignment algorithms and lidar slam in coal mine underground	<i>XUE Guanghui, ZHANG Zhenghao, ZHANG Guiyi, et al</i>	(301)
Adaptive zero velocity correction method for fiber optic inertial navigation system in coal mining roadheader	<i>MAO Qinghua, ZHOU Qing, CHAI Jianquan, et al</i>	(313)
Visual SLAM algorithm for underground robots in coal mines based on point-line features	<i>WANG Li, ZANG Tianxiang, SU Bo</i>	(325)
Multi-Robot exploration for coal mine rescue based on the extension of undirected graph	<i>ZHOU Linna, WU Tihao, HUANG Xinli, et al</i>	(338)
SLAM-based localization method of coal mine underground robot with adaptability to dark illumination environment	<i>JIANG Song, CUI Zhixiang, DAI Bibo, et al</i>	(349)
Method of tail beam posture prediction of top coal caving hydraulic support based on LSTM	<i>YAO Yupeng, ZHANG Jinglin, XIONG Wu</i>	(362)
Research and application on megawatt level intelligent fracturing pump system in coal mine	<i>LI Ran, WANG Chuliang, LIU Bo, et al</i>	(372)
System modelling and characteristic research of novel high water-based synchronous lubrication piston pump	<i>JIANG Hao, YU Lang, LI Yongkang</i>	(381)

Carbon Neutrality Science and Engineering

Evolutionary characteristics of microstructure of coal-based graphene from Ningxia coals: Comprehensive characterized analysis	<i>LI Ruiqing, TANG Yuegang, LUO Peng, et al</i>	(390)
Optimization and mechanism of wet desulfurization with fly ash based on response surface	<i>JU Kai, LIU Ying, LI Xin, et al</i>	(407)
Preparation of coal-based low-dimension carbon materials and the applications in organic solar cells	<i>ZHAO Yong, LIU Min, QUE Jianlei, et al</i>	(423)
Structure characteristics of microbial community in acid mine drainage in the Shandi River Basin	<i>TANG Chunlei, YANG Wenxiu, LIANG Yongping, et al</i>	(437)
